

SERVICE CONTRACTS

REFERENCE

START & DRIVE

The Renault Trucks Reference Contract covers you for preventive maintenance, ensuring that your vehicle is always legislation compliant and running to optimum standards.

At Renault we understand the challenges faced by owner-drivers and are here to help. The 'Reference' package includes regular inspections of your vehicles. Our inspections are centred on finding any defects before they evolve into an issue that could impact your business such as an expensive repair or replacement part; this also helps to protect your O-license and ensures you maintain a good OCRS score.

With this contract the expenses are spread out equally over the contracted period so that costs are easily monitored.

REFERENCE SERVICE CONTRACT – KEY BENEFITS

- Plan your inspections well in advance
- Protect your O-License and OCRS score
- Ensure your vehicles and drivers are safe and compliant
- Understand your costs with equal and fixed monthly payments
- Keep your vehicles on the road
- Vehicles under this plan receive regular maintenance check ups

Would you prefer a Repair and Maintenance Contract? – try **Performance**
