

OPTIFUEL ACADEMY OPTI-DRIVE

Knowing and understanding your equipment is important in any trade, and in transportation it is vital that your drivers know how to operate their vehicles properly in order to maximise safety, fuel efficiency and reduce the likelihood of unplanned stops.

This one-day course provides a basic introduction to the Opti-Drive transmission - Renault Truck's revolutionary gear changing system.

Drivers will also be given practical advice and on-the-road training on efficient driving, specifically related to their type of transport operation, whether this is long-haul, off road or distribution. By improving the skill of your drivers, you can maximise the efficiency of your vehicles, ensure productivity and ultimately save on your bottom line costs.

7 CPC HOURS

Benefits

- Better utilisation of the vehicle
- Lower fuel and maintenance costs
- Reduced stress and fatigue
- Increased safety and a lower risk of injury
- Lower environmental impact

Course Content

- An external walk round of the vehicle
- An internal introduction to the vehicle
- An introduction to numerous instruments & controls
- Opti-Drive training
- An assessment drive to determine the delegates' driving skills
- A second drive to enable the delegate to practice new driving techniques
